DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-10 are further rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japanese Publication 1-148901. Japan '901 teaches all of the structure of the claimed flange and bolt engaging portion including substantially coinciding center portions.

3. Claims 6,7,11,12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japan 5-50177. Japan '177 teaches all of the claimed structure of the flange and bolt engaging portion, including substantially coinciding center portions, and roller rings.

Response to Arguments

4. Applicant's arguments with respect to claims 6,7,11,12 have been considered but are moot in view of the new ground(s) of rejection.

In reviewing the claims prior to allowance, the Examiner's indication of allowability of the pending claims was reconsidered. In view of the fact that the "allowable" limitation was indicated as being the "coincident" center lines of the flange

Art Unit: 3676

and bolt engaging portion, the actual recitation that the center portions "substantially" coincide is broader than initially considered. Accordingly, these claims are now rejected in view of the cited Japanese publications which clearly show "substantially" coinciding center portions of the flange and bolt engaging portion. This action is non-final.
